

To: FCC

Subject: NAB petition that seeks to stop XM from providing XM Instant Traffic & Weather

This is another instance of a lobbying organization who wants to limit competition against their costumers. Our econimic systems a base on competition, some examples are the deregulation of the telecommunications industry. Such competition is not meant to harm an industry, but to give a choice to the consumer. If the FCC permits NAB's petition 04-160, it would harm the consumer by limiting the source where we can obtaining this type of broadcast. Please don't allow the NAB to monopolize the broadcast airwaves.
